

DataFlo Products and Services

Solutions that work. People who care.

We Are The DataFlo Experts!

No other company even comes close. In fact, we have the most experienced staff in the DataFlo community.

We can customize DataFlo to meet your exact needs, create new modules, or integrate to other applications. Our extensive suite of DataFlo products includes integrated Web solutions, custom DataFlo solutions, and utilities. Kore has a complete array of services to assist you with anything related to DataFlo or the UniData / UniVerse (U2) databases. See below or visit [Kore's Web site](#) for more information. **Call Kore for a quote.**

DataFlo Products

- [Kourier Integrator](#) – Best-in-Class integration tool suite for connecting DataFlo with other applications or databases. Provides ETL and EAI capabilities.
- [SQL Accelerator](#) - Use with Kourier Integrator for seamless integration between U2 and Microsoft SQL Server databases using MS SSIS or DTS packages.
- [Forms Manager](#) – Create and print professional laser business forms and documents directly from DataFlo, replacing expensive pre-printed forms.
- [Publisher](#) – E-mail, fax, and archive business forms, documents, and even DataFlo reports in PDF format using simple publish and subscribe rules.
- [Freight Control](#) – Integrated freight management system calculates freight, insurance, prints barcode labels, and manage outbound shipment tracking.
- [Package Contents Tracking](#) – Optional Freight Control module simplifies shipping with integrated package contents scanning and sending of package-level detail Advance Ship Notices.

Web Solutions Integrated to DataFlo

- [webPortal](#) – Enterprise information portal provides customers self-service access to their information 24/7.
- [webStoreFront](#) – Flexible, feature-rich, and cost-effective eCommerce storefront and product catalog.
- [webSalesForce](#) – Empower your sales team with SFA and CRM capabilities to compete and service customers.
- [webServiceCenter](#) – Manage field service calls, repairs, technician scheduling, and warranty tracking.
- [webTeam](#) – Web collaboration software for requests, projects, tasks, and documents.
- [webConfigurator](#) – Sell configure-to-order products online with dynamic page generation and rule validation.

DataFlo Custom Modules

- [Accounts Receivable Flex Terms](#) – Supports extended Terms of Payment, PROX dating, multiple payments, and flexible printing of payment terms on sales orders and invoices.
- [Barcode and Label Printing](#) – Design and print virtually any label (including barcodes) using information in DataFlo. Product labeling subsystem automatically prints labels when a specific stock transaction occurs.

DataFlo Custom Modules (cont.)

- [Credit Card Module](#) – Integrated, *real-time* credit card processing enables quick and easy payment of invoices via seamless integration with CyberSource for fast, reliable, and secure electronic card processing.
- [Sarbanes-Oxley Security Suite](#) – Implement better software change control, security auditing, and tighter system access with: Software Change Controls, Secure TCL Environment, Security and Process Access Auditing, and System Access Reports.

DataFlo Services
